

# Consolidated Quotes and Trades (CQT)

## Product Overview

The **Consolidates Quotes and Trades** feed provides easy and flexible access to high quality and reliable historical Level 1 data for Nasdaq-, NYSE-, NYSE American, OTC and other regional-listed securities—all through the cloud.

In order to match the entitlement structure, this feed will support three outbound channels. The data set will be channelized based on the listing market of a security.

Chanel	Securities Coverage
1 (CTA-A)	NYSE-listed issues
2 (CTA-B)	NYSE MKT-, NYSE Arca-, BATS-, and U.S. regional stock exchange- listed issues
3 (UTPBIN)	Nasdaq-listed issues

## Publisher

Nasdaq Investment Intelligence is a leading source of market data, global indexes, and investment data and analytics. Powering price discovery and decisions around the globe, our data is distributed to millions of people daily, providing them with innovative real-time and historical information, as well as analytic solutions designed for investors of all sizes and at every stage of the investment lifecycle. To learn more about the company, technology solutions and career opportunities, visit us on [LinkedIn](#), on Twitter [@Nasdaq](#), or at [www.nasdaq.com](http://www.nasdaq.com).

## Delivery

Nasdaq Cloud Data Service (NCDS) provides a modern and efficient method of delivery for realtime exchange data and other financial information. Data is made available through a suite of APIs, allowing for effortless integration of data from disparate sources, and a dramatic reduction in time to market for customer-designed applications. The API is highly scalable, and robust enough to support the delivery of real-time exchange data.

This repository provides an SDK for developing applications to access the NCDS API. While the SDK is open source, connecting to the API does require credentials, which are provided by Nasdaq during an on-boarding process.
